6-8 Hours

## Every Vehicle Fire Fighter with F-500 EA®

### Course Overview

This course prepares firefighters to save lives and reduce loss across all vehicle types: ICE, hybrid, and electric vehicles. Through real-world applications, best practices, and SOGs, firefighters are equipped to manage modern vehicle hazards—more synthetics, combustible metals, lithium-ion batteries, and diverse fuels—enabling versatile response with F-500 EA®.

# Every Vehicle Fire Fighter

## with F-500 EA®

Class size and time can be adjusted to meet your needs.

### Course Objectives

- Identify hazards associated with modern vehicle incidents involving consumer vehicles, commercial trucks, mass transit, and heavy equipment.
- Explain tactical decision-making, fire and explosion risks, and SOG-based roadway response aligned with NFPA codes and standards.
- Prepare incident pre-plans and action plans using F-500 EA®, firefighting equipment, thermal imaging, and air monitoring technologies.
- Demonstrate safe, effective incident management through sound tactics, systematic hazard control, and best-practice post-fire handling.
